Editor,

The BC government has tabled Bill 30, the Resource Road Act.. While the stated objective is to improve road safety, it provides for restriction of public use. This Bill will result in “privatization” of the back roads.

This Bill is very vague, but it has ominous provisions for those of us accustomed to using logging and other resource roads. The clear result will be more road gates and more roads being torn up.

Roads users are urged to write The Premier and their MLA’s asking that this Bill be withdrawn to provide a re-write based on public and user group input.

More information can be found at the web site [www.resourceroadsbc.com](http://www.resourceroadsbc.com).

Yours truly,
